

TECHNICAL MEMORANDUM (NASA) 8

SELECTED BIBLIOGRAPHY OF OMEGA, VLF and LF TECHNIQUES APPLIED TO
AIRCRAFT NAVIGATION SYSTEMS

A bibliography of references collected during
the first three years of the NASA Tri-Univ-
ersity Program in Air Transportation Systems.

I. INTRODUCTION

This Technical Memorandum documents those reports and papers collected for use under the NASA Tri-University Program in Air Transportation Systems at Ohio University. The collection of pertinent data is a continuing process which will result in additional bibliography entries which will be reported in future memoranda.

II. ACKNOWLEDGEMENTS

The literature search reported here involved contributions by several members of the NASA staff. They are:

Faculty and Staff:	Ralph Burhans, Engineer Robert Lilley, Consultant
--------------------	--

Students:	Kent Chamberlin Rich Salter Dan Moyer Dan Ellis
-----------	--

III. BIBLIOGRAPHY. Selected Bibliography of OMEGA, VLF Techniques, Time Frequency, and LF Methods as applied to aircraft navigation system problems.
(* Indicates Ohio University papers and reports).
